PROJECTS

Project Title: Lazarev Animated Website

Company/Organization: For Learning Purpose

Duration: July 2024 – November 2024

Project Overview:

This project is a clone of a Lazarev website which is a UI/UX design company they have a lot of animated elements in their website so I designed it beautifully with my experience and add animated effects to copy as much as I can.

- **Project Title**: Docs-Mini App
- **Company/Organization:** For Learning Purpose
- **Duration:** December 2024

Project Overview:

This is React app created with Vite framework I created it recently and designed it by Tailwind CSs and add up all the logics in JavaScript.

- **Project Title**: React To do List
- **Company/Organization:** For Learning Purpose
- **Duration:** December 2024
- **Project Overview:**
  - This is React app created with Vite framework I created it as a task manager by using react Js. We can add up a task also delete the task and update the task as well in this app

Project Title: Crud Operations (Express Js)

Company/Organization: For Learning Purpose

Duration: January 2025

Project Overview:

- I learned crud operation of express Js by creating a file management system where we can create, read, update and delete the file by using server-side rendering
